June 2012

Stormwater harvest workshop - WaSSH - 01/06/12

Manningham City Council Doncaster Victoria

Clearwater and the WaSSH (Water Security through Stormwater Harvesting) Group have organised a series of workshops for organisations that have received funding under the Federal Stormwater Harvesting and Reuse grant. The objective of the workshop series is to create a network of funding recipients who share knowledge and experience and address common issues.

Workshop: What is a Water Sensitive City? - 05/06/12

2 Simpson Street Warrnambool Victoria

Clearwater, in partnership with Warrnambool City Council and Horizon 21 will be delivering a free workshop to learn about the benefits of applying Water Sensitive Urban Design, a range of sustainable water management techniques, and relevant policy and legislation.

July 2012

Stormwater Harvesting: Concept & Design - 05/07/12

Karstens Conference Rooms Melbourne Victoria

This one day training course, developed in partnership with Monash's Centre for Water Sensitive Cities, will introduce you with the concepts required to design an effective stormwater harvesting project. The workshop will feature insights into stormwater harvesting guidelines, latest research on the performance of stormwater treatment technologies, conceptual design and costs associated with stormwater harvesting systems. The course will include practical design exercises to develop the conceptual design of a stormwater harvesting system for a (i) greenfield and (ii) retrofit situation.

Music training courses - 11/07/12

CBD Melbourne

Clearwater, in partnership with eWater delivers a range of software training courses that models urban stormwater drainage, and assists the decision making process for stormwater management and Water Sensitive Urban Design. The latest version of MUSIC V5 is now available.

October 2012

Growth Area WSUD Tour - 11/10/12

October date to be confirmed

Clearwater's latest tour travels to Hume City Council and The City of Whittlesea. The tour will include site visits to biofilters and wetlands in new housing estates, visits to council owned WSUD assets and town centre renewal projects incorporating WSUD and stormwater harvesting.
